

THE ENTERPRISE INTELLIGENCE LAYER

Your company is full of signal. Most of it is wasted.

Everything you need to hit your objectives is already sitting in your inboxes, calendars, meetings and CRM. imovum IQ turns that signal into one clear priority — for every person, every level, every day — always tied back to your OKRs.

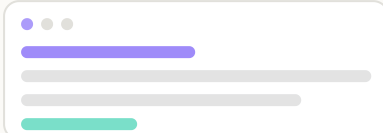

A platform shaped to your operations, with hands-on upskilling for your people. Software and humans, working as one.

Strategy dies on the way down.

- Your OKRs live in a spreadsheet nobody opens.
- Leaders run on gut feel.
- Engagement surveys arrive months too late.

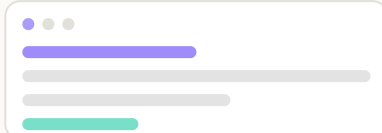

Employee

Today's Focus. Ari drafts the replies.

Manager

Team load, strain, evidence-based coaching.

Senior Leader

Strategy cascade and org health.

Plus: a live talent map, internal succession simulation and replacement planning — running live in your business every day.

Runs on your own LLM. Your data never leaves your environment.

Bring your own keys. We sit on top of Microsoft 365, Google Workspace, Salesforce, HubSpot, Slack and your own LLM — we never see your data, and there's no new system of record. Model-agnostic by design, so you're never locked into one AI vendor.

01

Deploy

Wired into your stack — live in six weeks.

02

Adopt

Delivered by the people who built the platform.

03

Transform

We stay in the loop. Intelligence that compounds.

WHY IMOVUM

Nobody owns this internally.

It falls between IT, HR and Ops. We own it with you.

We built it for ourselves first.

It ran our own company before we productised it.

Strategy married to execution.

Not slides — a working platform we stand behind.

Priced on value, not seats.

One platform replacing a stack of point tools.

WE'RE ONBOARDING A SMALL FOUNDING COHORT OF DESIGN PARTNERS — SHAPE THE ROADMAP WITH US, ON FOUNDING TERMS.

Lead the workforce achieving today, so you win tomorrow.

No account managers. You work directly with the team that built it.
